EXPLANATIONS/ DETAILS

During my law education, I have attended almost every any panel, symposium, etc. I believe that, I have learnt a lot of things from all of them. To profess law, I think, it must be followed and queried the progress in the world and this education process, which is actually never gonig to end, also must be raised with the other social sciences. My dream is to be an academics. Nevertheless, in the future, wherever I will be and whatever my profession will be, I wish to thrust out my hand to people who needs me, to awareness them about the rights and fredoms they have. So, I can become “ a responsible citizen” and fill the blanks which belongs to me, in order to have a part constituting new Turkey which is “contemporary, bright, democratic, laic, socail” and “based on rule of law”. Because, life is a miraculous arras which hasn’t been fulfilled yet. And only we can fill the blanks which belongs to us.
